

PRA SERIES

Compact coaxial spot lighting

Designed to replace fiber optic light sources in coaxial/lensing applications. These Spotlights have a tip diameter of 8mm and an emitting surface diameter of 6mm, and can be mounted on the coaxial unit of a macro lens or a telecentric lens. This series features low power consumption.

► Z3.1 - Driver inline

Driver on the aerial connector cable for iBlueDrive and continuous type equipment.

The driver is placed in the cable that connects the lighting with the connector, it contains the control electronics of the device and is used when it is not possible to integrate it inside the lighting in both iBlueDrive and continuous types. Functionally, there is no difference between lightings with inLine or integrated driver.

The inline driver is in charge of managing the power of the device, therefore it is advisable to fix it to a metal structure to improve the heat dissipation that it produces.

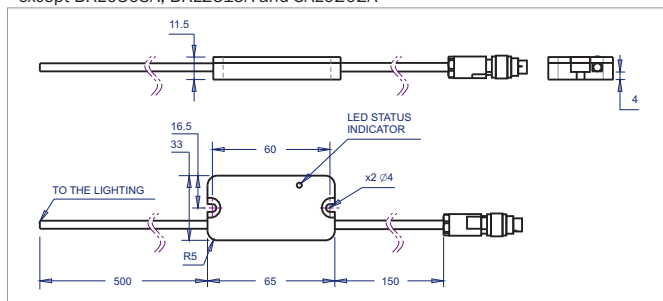

There are 6 different models of inline drivers and each of them is used with a particular lighting model, depending on its power needs or environment in which it will be used.

Standard (St00)

Standard driver used in most of the equipment with external driver both in continuous type and iBlueDrive.

Used in ALD, ALS, ALU, ALW, AUB, BKC, BKL* , DKL, DOM0906A, DOM1410A, DOM1613A, DOM2414A, PLA, PLD, PLU, PRF (iBlueDrive) , PRY, SAC, SAL*.
*except BKL0303A, BKL2515A and SAL0202A

Standard IP67 (St01)

IP67 standard driver used in most of the devices with external driver in both continuous type and iBlueDrive that require IP65/IP67 protection.

Used in BKL* , DOM0906A, DOM1410A, DOM1613A, DOM2414A, PRD0500B.
*except BKL0303A and BKL2515A

Low Power (LP)

Low power driver used in most of the equipments that have external driver both in continuous type and iBlueDrive that require less power.

Used in PRF (continuous), BKL0303A, PRA0818A, PRD0200A and SAL0202A.

High power driver

High power driver used in most of the equipments that have external driver both in continuous type and in iBlueDrive that require more power.

Used in DOM1613A.

High Power IP67(HP01)

High power driver used in most of the equipments that have external driver both in continuous type and iBlueDrive that require more power and IP65/IP67 protection.

Used in DOM1613A.

Multisector (SE)

Driver used in most of the equipments that have external driver in iBlueDrive type in its multisectorial versions (both RGB and 4 sectors).

Used in DKL1813A, DOM0906A y DOM1410A

WARNING! In continuous and powered mode, clamp driver to a metal surface for heat dissipation. In Strobe mode is not required, but recommended.
